## CONGRATULATIONS

To all of the newly re-elected club officers. It just goes to show that the more things change, the more they stay the same.

## SPECIAL NOTE:

Since the first Tuesday in July is July 4th, the main meeting will be combined with the ST and PC Sigs on Monday July 10, at 8:00 P.M.

## PROGRAM DETAILS

(Car)CALAMITY is an arcade style Game for one player with J/S. By A.W. Hailes, Jr. You accumulate points by avoiding the scrolling barriers in an endless series of screens. You start with four cars. It's self explanatory except for the SuperShield (use FIRE BUTTON to activate). You can increase Diff. by modifying program line 97.

CPALETTE (Color Pal.)- from ANTIC 6/85- by John Felton. It's a program UTILITY (& DEMO) to ease selection of color and Luminance. It's on OHAUG's Newsletter disk for 5,6/1995; with an added set of their explanatory notes, so you don't have to dig up the ANTIC magazine article.

JRD.BAS (J.R.'s Dots)- is another easy Game from J.R. Payne. It's very much like PAC-MAN; with instructions; 4 timed mazes; but no "ghosts"! It's surprisingly hypnotic! It was on the AIM disk for 2,3/1992.

KEND.EXE (King KenO) from ANTIC's 7/88 issue, is by Len Shikowitz. The SLCC disk #1303 had a simpler version called CHEAPO KEND. I think you will find this bigger, faster, & flashier! It also has a built-in Help file (you select it from the first screen).

MAGICSCR.BAS is both a DEMO and a programming UTILITY. It, too, was on the OHAUG Newsletter disk for 5,6/95. It's an amazingly clever DEMO in such a small space (8 sectors). I modified the message for our disk. Run it and see what it does,- then think of ways to use it for your own purposes.

PSTR201.BAS is the current update of Tom Andrew's PRINTSTAR. It's based on my suggestions to him for printing 6" X 9" pages (see SLCC1304.DOC). The file PSTR201.DOC, on this disk, gives a brief description of this version & the background for it. Tom has also revised REFORMAT (a companion to PS). I will put it on next month's DOM.

SURPRISE by Brad Kershaw; is self explanatory. It's the bonus program on ANTIC's 9/85 disk, & a deceptively easy Game of "Find The Pea". For one player with Joy/Stick.

CASCADES and PICTURES4 are 2 selections for the AMP2 player which was on the SLCC disk last month- (#1306). Both are on the ANTIC disk for 6/89. Neither has lyrics. PICTURES4 is from "Pictures at an Exhibition".

SPITE -AURA- uses the whole back for these 6 (\*.COM) DEMO files:- SWING- good Music, and fine gRaphics. (Hit [RESET] after menu loads it!) GCASOUND- a Music player like a radio with 10 buttons. Fine music! The "AMPLIFIER" toggles 3 voices.

DRACK- [START];[SEL.] toggles Music. BOX2- 6 Mus. sel.+ gR.; Polish text. WAFINFO- Music; German/English text. CHICK(Scratch)- Easy word Proc.; like TEXTPRO;- move it to another disk, (w/DOS); hit [CONTROL+H] for Help.
